Tanuja Patil, 11th Arts B

World is beautiful  
Every life is beautiful  
Every man is beautiful  
Every minute is beautiful  
Because of the beautiful world.

Life teaches us love and affection towards our country. Due to it many leaders born in India. Their good thoughts moulded India. One of them is Mahatma Gandhiji who is my favourite leader.

Gandhiji believed in non-violence and truth. His passive resistance against injustice was called "Satyagraha". He believed in simple living and self-control. He wore only a small 'dhoti' just like an Indian peasant. Gandhiji's principles and leadership helped us to win freedom from the British.

Today, many people feel that those principles are out-of-date but those who still practise them, know that they are still effective. There are crimes against humanity like war, violence and terrorism. World never wins if we don't follow Gandhiji's Principles.

# The Environmental Pollution

Kum. Harshada Devdatta Kadam, 11th A (Sci.)

**Save Trees, Save Environment, Save Earth, Save Life.**

Environmental pollution is very harmful to human beings surviving on the earth. There are many types of pollution for e.g. Air pollution, water pollution, noise pollution as well as soil pollution.

**Air Pollution :-** It is caused because of the chemicals used in Industries. The vehicles release carbon dioxide and many dangerous gases in the air which is very harmful to all the human beings as well as animals, birds surviving on the earth. As the air is getting polluted it becomes very difficult. For the survival, the increased ratio in the population caused to the cutting of trees and all the jungles have been destroyed from the earth. We get many useful thing such as wood, furniture, papers etc. and the most important thing that treat air. As a cutting of trees has increased man has to face many problems such as lack of fresh air, lack of clean climate and many more.

**Noise Pollution :-** Now a days people are suffuring from noise pollution that is created by the loud speaks, harns of vehicles, etc. On many occasions such as Navratra, Ganeshotsav, Holi etc. we create a lot of Noise pollution and on Diwali we burn fire crackers, which create a lot of noise and because of that the birds can die as their heart cannot bear this noise.

**Water Pollution :-** It is created by the chemical and dangerous gases released in water from the factories residing near the river, Drainage system throughout which all the water is mixed in the

river water. People living in the rural area take their animals to river to wash them in that water. They wash their clothes. As result the water is polluted.

As a conclusion whatever may be the pollution, it is harmful to all of us. We must take care of our environment, must be careful, faithful to our environment and save our life as welllls as all the human beings surviving on the earth. So not only save environment and life. but also save birds and animals. He birds, all the animals and trees are the major parts of the environment.

## Birds : Our Friends

Tanaya Modak, 11th Sci. A

What are birds ? Scientifically, birds are the organisms belonging to class Aves of Phylum Chordata of kingdom Animalia, Commonly birds are creatures which are well acquired to humans, who have great influence in our life and they have unique ability to fly.

Birds are the part of food chain. They keep control on the population of pests, insects etc. Small birds hunt or kill the snakes, ferodents, etc. for food. In forests, the killed animals are left out by the lions or tigers, the rest will be consumed by birds. At early

We humans are well familiar of birds. They are special kind of animal species with specific characters. All of them are feathered, winged but some birds can't fly. They are bi-pedal, egg-laying, warm-blooded vertebrates. They play a very important role in eco-system and they are present across the globe from the Arctic to the Antarctic.

Birds inhabit the environment that suits them and that is why not all the species of birds are known to us. Some birds live near to human residents and some like to live in forests while some live in polar areas. In spite of all the similarities that the birds share. They have some differentiations also.

The smallest bird on the earth is hummingbird whereas the largest bird is like ostrich birds weave nests for them and the safety of their infants. They weave nests on the branches of the trees where they can find their food.

Birds are closely connected with the nature sparrows look wash in the soil. All the birds found the tastiest fruit on the tree. Peacock starts dance before the rain comes. They are very accurate predictors of rain than any of the forecast machines. Owls and vultures are said to indicate a bad, unpleasant weather in that area. Certain birds are kept near mine to predict the mine explosion. Weaving bird builds the strongest nest for him without any cement.

Birds are some creatures which not only add beauty to nature but also contribute to nature. Birds are the main agents to propagate seed. The birds eat the fruits and undigested seeds get excreted. Then in favourable conditions, seeds get germinated.

mornings, cock's sound do a job like alarm for the villagers. The chirps- chatter of sparrows makes our mood fresh. Many of us put a parrot in cage in their house for entertainment. Parrots can be trained as a entertainer by teaching speak like humans. Watching peacock's dance is soothing for mind Cuckoo's song is the best song someone can hear. We call someone as "Kokila". It she has the sweet voice. Also many farmers start poultry or feed the ostriches for economical wealth. In many forest regions, hunting is common job. Hunters hunt or kill the birds and sell them. In musical industry, sound of birds is used for producing music.

In Indian mythology birds have a important role. Lord Vishnu gives a bird Garuda a special space in life Garuda is 'Vahana' of Lord Vishnu. In Ramayana bird Jatayu fights with Ravana to save Sita. Peacock is the 'Vahana' of Saraswati as well as Lord Kartikeya. Swan has a special power of separating milk from water known as knowledge of "Neerksheer". So in India swan is treated with respect. In ancient days. Dove was used as messenger. So, in many novels, novelists use the presence of dove.

When we look at nature's beauty, first thing comes in mind is watching birds. Many people keep a hobby of bird watching. A well known bird watcher of India is 'Birdman of India' called to Dr. Salim Ali. He was the first Indian who conduct Bird survey across India and wrote books on birds. He was part of making Bharatpur bird Sanctuary to protect the birds.

Now a days, many birds are on the verge of extinct. Who is responsible for it? The common answer for it is human beings. Human is the major reason for the decreasing population of birds.

Human wants his progress, but always he forgets the environment.

Human Build the forest of cement.  
But destroys the forest of trees.

Trees are the habitats of birds, we destroy trees and the birds last their habitat. Also the pollution created by us is harmful for them. Global warming is killing them. Use of mobile, the radiations comes from it, are not good for the sparrows and also for

other birds.

Humans think only about himself. But he is blind about the threat coming in future. Environment needs to balnce. If human tries to break balance, then it's not good for anyone. Birds who make our life beautiful, cheerful and makes our mood good, contributor to nature, we are the main reason behind the decreasing population of them. So, we have to Live and let live our friends.

## Life .....

Life is wheel of change  
Change is rule of nature  
Nature is creation of God  
God is unseen power  
Power makes man strong  
Strong men never cry  
Cry is reverse of joy  
Joy is mood of mind  
Mind is full of good thoughts  
Good thoughts makes sweet home  
Sweet Home is temple of love  
Love makes life healthy - wealthy

## My Role Model - My Teacher

Sagarika Mundecha, XI Sci.

I have no where to turn, have no where to go  
this is just something  
I think you need to  
know.

I don't know what  
made me trust you.  
I still remember  
the day when I told  
you what I've been  
through. I thought  
I should run away, go  
hide in a hole but then  
you really brought out  
my true soul.

As each day grew longer  
Our trust became stronger  
Every time I wanted to cry.  
You stayed there right by my side.  
Then I moved to the next grade  
Why was I afraid?  
That our trust would slowly fade,  
but I was wrong,  
We are still strong

Even though sometimes you don't have time,  
You, at least ask me if I am fine. Even though  
sometimes I am not, I feel like I have just been shot.  
I smile and say yes, I'm right.

Then I walk away and you're out of my sight but  
never out of my mind. I'll just have to wait I still have  
my fate.

I am so glad, that you were there when I was  
sad, and this is what makes you

Not just my teacher;  
But also my friend.

You are my best teacher; you taught me the  
best lesson of life.

## Trees are our Best Friends

Mali Puja, 11th Sci. A

Environment plays a very important role in  
our life. We are living on the earth. The earth is  
surrounded by so many living and non-living things  
such as trees.

Trees play very important role in your life. Trees  
are our best friends which are very close to us. Trees  
also help to birds and animals as the houses for  
them. In a hot noon we can rest under the trees.  
In-directly they are responsible for rain so they are  
very important.

Tree plantation is the need of the time. We  
cannot live without trees. Trees are our good friends.  
They provide us wood, food, fuel, fibres, shade,  
medicine, fruits, flowers etc. They serve man. Trees  
conserve soil and water. They preserve 8 balance  
gases in the atmosphere, so friends we should plant  
more and more trees. EACH ONE, PLANT ONE TREE  
should be our slogan and mission.

The great saint Tukaram says - "Vruksha valli  
amha soyare."

Remember trees are our lungs. They take  
carbon dioxide (CO<sub>2</sub>) and release oxygen (O<sub>2</sub>) in the  
air. Imagine earth without forest. Entire earth will  
be-come "DEAD-ZONE" without trees. Trees are our  
life-time energy so plant trees, grow trees, keep  
them, protect them. Save environment "SAVE LIFE-  
SAVE TREES." If we don't do this there will be end of  
human beings and other living organism or species.

No trees, no oxygen,  
No Oxygen, no life,  
No forest, no rain  
No rain, no life

Trees are part of environment. But because of  
interference of human beings in environment, now-  
a-days there are so many problems in environment.

We must take immediate steps to fight against  
cutting of trees and saving our environment. We  
must plant more and more trees for saving our  
environment. We have to protect our forests. We  
must protect the natural treasure on the earth.  
This is our earth, and we are its guardians. We must  
strive to take care of it to the best of our ability. If we  
stop cutting the trees, then environment or forest  
will be automatically saved so, friends we must save  
the trees.

# Purpose of My Life

Dhairyasheel Vikramsinh Swant, 11th Sci. A

Every man has his own desires and his own aims for the future. Some people run after aims for the future. Some people run after worldly wealth. They become doctors so that within few years they may have cars, big bungalows. Others are politicians for position and power. They try to seek government jobs and become IAS officers. I have no such ambitions. My ambition in my life is to become an Engineer and serve my land.

There are various reasons to be an engineer in life. I feel that as an engineer I would have greater opportunities of serving my motherland, than any other occupation. India has been on the road of economic development for the last fifteen years or more, much has been here but much more still remains to be done. Our economic development has not been so rapid as it should have been. It is mainly the birth of qualified engineer than has held back the process of the country. Late Mr. Nehru was never tired of emphasising the urgent need of engineers for the country so, I feel I should be an engineer and do my best for the nation.

My ambition in my life is become an honest engineer and make others an honest dutiful by my own example and influence my ambition is to root out corruption and dishonesty from profession.

It is my daily prayer that God may make me an engineer and also succeed in my ambition without dishonesty and corruption.

As an engineer I would be constantly working for my country both in rain and sunshine. Besides this engineers are constantly on the move.

# No Addiction

Tupsoundarya Laxmi Krishna, 11th Sci. A

Addiction is  
"Way to death"

Long long years ago - the number of population as well as pollution was less. There was no addiction. There were only happy persons.

But day by day not only population but also pollution is increasing. In past, there were large amount of trees . So they kept atmosphere healthy & fresh. People in the village lived happily. So there was no any type of tension of them.

Man made some artifical instrument for their purpose. But he did not find what & how tension on them decreases. In past the people didn't know what was the addiction? .. What is the meaning of "Yogasana?" In past trees, plants, men, women, grandmother, grandfather etc. everyone was happy. They didn't know what was tension.

Mind pollution was a kind of pollution, in which the mind of human being was surrounded by many problems, And due to problems, tension was raised & due to tension every one can select one & only one way as addiction like smoking, drinking etc.

If we watch TV then we observe that at the corner of the screen one sentence. We see, "DHUMRAPAN SEHAT KE LIYE HANIKARAK HAI". means, smoking cigarette , chewing Guthkha, tobacco eating etc. these things are harmful for human being or every living organisms. Also if we watch the tobaco packet, on that packet one sentence we saw "TAMBAKU SE CANCER HOTA HAI."

After reading that we can't stop it but we eat more & more. Because we cannot control our will. In the world there are about 90,000 peoples who are suffering from mouth cancer, heart problem., throat cancer etc. Due to their parents young generation also imitate smoking.

What are its benefits? What are advantages of smoking? No, nothing, there is no advantage of smoking. But the disadvantages are more , more & more.

In one of the poor families one person who fight with his wife for his addiction what is his addiction

आपका धुम्रपान सबके स्वास्थ्य  
के लिये हानिकारक है.

smoking of cigarette. Then his wife gave some rupees. After 3 months her husband is dead.

After sometime she handle the situation & go for work, takes all responsibility of her child. Due to one person's addiction the whole family is on the road.

So request all of you to be careful & do not smoke. If you want to smoke you imagine what will happen if you die, your whole family will be happy or sad if you die only for smoking.

## Blood Donation

Rohini Ramesh Patil, 11th Sci. A

Blood Donation is life donation,

In Indian culture blood donation is the best donation. We donate many things such as food, cloth, water etc. but organ donation and blood donation are rare and these two factors are essential for body.

Human blood is divided into four types A, B, AB and O. because of Rh Factor we can conclude positive or negative blood group as like as A+, or A- or B+ or B-, AB+ or Ab+, O+ or O-. Blood group O is donar blood group and blood group AB is receiver blood group which receives blood from all the other blood groups. After blood donation blood is stored in blood bank. It is stored for a week or as it is required. Later it is preserved in the plasma form. If we donate blood, we get the blood donation certificate, when we need blood from blood bank, we use that blood donation certificate and get blood without any cost.

**“Donate Blood, save life”,**

In accidents or operation cases many patients need blood. At that time blood banks are boon to patients. Because of our blood we can save patient's life. Therefore blood donation is the most important in our life.

To encourage the blood donation, we have to start the groups at different places. Donation of blood is a prime need of the country and the Government itself has taken charge of the department. It requests all healthy citizens in the country to donate blood. This is done through publicity in the form of boards, hoardings etc. Infront of hospitals or through media advertisement.

## Indian Farmer

Dipali Vilas Jadhav, 11th Sci

Friends, Indian farmer is a great social worker. He works very hard. Besides he leads a very hard life. He gets up very early in the morning and goes to sleep very late at night. If we compare farmers with other social workers like doctors, teachers, we notice that farmers lead very hard life than others. But they get more benefits than farmers. Not only farmer but also his family have to work hard. In all seasons, he has no holidays. All the days, all the seasons, he is busy in growing crops.

We live because of farmers. Without food, we cannot live alive. Farmers balance the human life, so it is said that farmer is “Jagacha Poshinda”. He is care taker.

We know that how farmers manage their families. They face many financial problems. In rural area, they face problem of load shading. Their life is darkened due to it in such condition, the family support him. His children face educational problems. They cannot get educational facilities.

Farmers work hard but get little success. At present, their condition is very dangerous. No one cares him. Government takes responsibilities of servants, corporates, business men, government servants but it is careless about farmers' economic progress. Farmers face number of problems. The people add their difficulties by deforestation, pollution, population.

But we can support the farmers by planting more trees. Increased number of trees will indirectly help the rainfall and growing crops. We can keep watch no manufacturers of insecticides, fungicides and fertilizers, who are responsible for adverse condition of soil, crops and income of farmers. Farmer is back bone of Indian economy. It is also one type of social work. So respect farmers and their families.

In modern farming, machines have taken place of bullocks. Organic farming, knowledge of market, use of modern technology, use of earthworms in farming will really improve economic condition of Indian farmers. Farmer is next to God.

# Key to Success

Sandeep More, 11th Sci.

Every human gets success after struggling in his life. Human gets success by facing many difficulties, sorrows.

“Human life is mystery, the mystery of life is life it’s self”. To achieve success in our life we should work harder and harder. Then we can achieve success is not a simple unit it makes the humans to face a lots of difficulties and challenges. Human’s life is lot of up’s and down’s . Success is not easily possible to achieve but it is not also impossible to achieve. The only way to achieve success is by “perseverance and by patience”. Perseverance means continuous hardwork. Perseverance is the ladder to our success. Human perserves in his life he achieve the goal in his life.

There is great saying in Marathi -

“प्रयत्नाने वाळूची कणे रगडीता तेल ही गळे”

It means after struggling the particles of sand can be converted in oil.

There is also one another saying in marathi,

“सतत प्रयत्न सुद्धा नशीबाला मात देऊ शकते”

It means continuous hard work can win against the faith the major point that human has that to work hard.

Success in life is just not matter that how much opportunity did you get or how much talent is their in you. It just only matters about hardwork and perseverance.

There is great saying by Hellen Keller that, “ I shall succeed someday, if I only persevere.”

Study the struggling life of Hellen Keller. She was born on 27th June 1880 in Alabama USA. She suffered severe impairment of her vision and

hearing after an illness in infacny. She drelled oion visual gestures and signs to communicate with her family. The turning point in her was at the age of seven when she met her tutor Anne Jullivan.

The tutor started teaching Keller to communicate by spelling words with her finger’s on Keller’s hand . Keller’s breakthrough in communication come when she realized that the motion her teacher was making on her palm of her hand, symbolized the idea of “water’ Keller later

described the experinece.” I knew then that “W-A-T-E-R”.

Meant the wonderful cool something that was flowing over my hand.

In this way slowly - slowly she earned a degree in Bachelor of art’s at the age of 24. The first person taking degree with impaired vision.

In this way she succeed in her life after being impaired vision.

The language she studied is barille

o <sup>c</sup> o	o <sup>A</sup> -	O <sup>T</sup> -	= CAT
--	--	oo	
--	--	--	

But we have everything vision, hearing capacity “why couldn’t we succeed. It is becauseof lack of perseverance and patience.

“Patience and peseverance will win in the end”

“”Be not be afraid of growing slowly only be afraid of standing still.

## INTERNAL QUALITY ASSESSMENT CELL (IQAC)

In pursuance of its Action Plan for performance evaluation, assessment and accreditation and quality up-gradation of institutions of higher education, the National Assessment and Accreditation Council (NAAC), Bangalore proposes that every accredited institution should establish an Internal Quality Assurance Cell (IQAC) as a post-accreditation quality sustenance measure. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the overall performance of institutions. Preparation of the Annual Quality Assurance Report (AQAR) as per guidelines and parameters of NAAC is done by the college IQAC and submitted to NAAC in the year 2016-17. As suggested by the IQAC, the department of physics and chemistry has submitted a proposal for starting the post graduate course from June 2016 to Shivaji University, Kolhapur. Government of Maharashtra has permitted to start the post graduate course in Physics.

As discussed and suggested by the IQAC during the academic year 2016-17 Physics department has organized an international

level seminar, department of Political science conducted a national level seminar and department of mathematics organized the university level seminar. During one of its meetings honorable members suggested increasing the intake of Post graduate course in Physics and once again ask the University for the Permission to start Post graduate course in Chemistry. Accordingly both the proposals are submitted.

NAAC is in the process of revising the methodology of assessment. Looking to the validity of present accreditation i.e. January 2018, the steering committee unanimously decided to prepare the SSR report as per new guidelines of NAAC in the next academic year

Hon. Principal Dr. S.Y. Hongekar, who has not only chaired the cell but guided us at every nooks and corners of the development,. IQAC would like to express gratitude towards all other members of cell for their active participation and fruitful discussion.
